

CLAIMS

CLAIM 60. Cancel claim 60

CLAIMS AMENDMENT (Marked Copy)

CLAIM 45, rewrite as claim 45 (amended) as follows

45) (amended) A self sealing letter sheet, so structured as to enable:

1) a private message and

2) a discretionary non-private message,

so the need for an envelope is eliminated,

said self sealing letter sheet comprising:

a) a blank of a sheet material, further comprising:

b) at least one mono-sectional flap,

c) [at least one] a mono-sectional body,

d) at least one layer of adhesive, and at least one layer of adhesive inhibitor applied to said blank of a sheet material, in such a manner that when each of said at least one mono-sectional flap is in contact with said [at least one] mono-sectional body, said at least one layer of adhesive faces said at least one layer of adhesive inhibitor, whereby each of said at least one mono-sectional flap and said [at least one] mono-sectional body can be removably fastened to one another,

whereby said self sealing letter sheet is manufactured,

and whereby the user can input said private message and said discretionary non-private message, and subsequently fold said body and seal said self sealing letter sheet.

CLAIM 49, rewrite as claim 49 (amended) as follows

49) (amended) The self sealing letter sheet of claim **45)** wherein said self sealing letter sheet further comprises means for detachment of a section of said self sealing letter sheet, and said section further comprises:

e) at least one mono-sectional flap,

f) **[at least one]** a mono-sectional body,

g) at least one layer of adhesive, and at least one layer of adhesive inhibitor applied to said section, in such a manner that when each of said at least one mono-sectional flap is in contact with said **[at least one]** mono-sectional body, said at least one layer of adhesive faces said at least one layer of adhesive inhibitor, whereby each of said at least one mono-sectional flap and said **[at least one]** mono-sectional body can be removably fastened to one another,

whereby a detachable subordinate self sealing letter sheet is produced.

CLAIM 50, rewrite as claim 50 (amended) as follows

50) (amended) A self sealing letter sheet, comprising:

a) at least one flap,

b) a rectangular body,

c) at least one layer of an adhesive substance applied to each of said at least one flap,

d) at least one layer of an adhesive inhibitor substance applied to said rectangular body,

so when said at least one flap is placed in contact with said **[at least one]** rectangular body, each of said at least one flap is temporarily connected to said rectangular body, whereby

said self sealing letter sheet is manufactured.

CLAIM 53, rewrite as claim 53 (amended) as follows

53) (amended) The self sealing letter sheet of claim **50)** wherein said self sealing letter sheet further comprises means for detachment of a section of said rectangular body, and said section further comprises:

e) at least one flap,

f) a rectangular subordinate body,

g) at least one layer of an adhesive substance applied to each of said at least one flap,

h) at least one layer of an adhesive inhibitor substance applied to said rectangular subordinate body,

so when said at least one flap is placed in contact with said rectangular subordinate body, each of said at least one flap is temporarily connected to said rectangular subordinate body, whereby

a detachable subordinate self sealing letter sheet is produced.

CLAIM 54, rewrite as claim 54 (amended) as follows

54) (amended) A self sealing letter sheet, folded so it comprises:

1) a first ply and

2) a second ply,

wherein said first ply is a body,

and said second ply is at least one flap, overlapping said first ply,

further comprising:

a) at least one layer of adhesive on said second ply, and

b) at least one layer of adhesive inhibitor on said first ply,

arranged so when said at least one layer of adhesive **[faces]** is in contact with said at least one layer of adhesive inhibitor, said second ply is temporarily fastened to said first ply, whereby said self sealing letter sheet is produced.

CLAIM 57, rewrite as claim 57 (amended) as follows

57) (amended) The self sealing letter sheet of claim **54**), wherein said self sealing letter sheet further comprises means for detachment of a section of said self sealing letter sheet, and said section is folded so it further comprises:

1a) a first ply and

2a) a second ply,

wherein said first ply is a body,

and said second ply is at least one flap, overlapping said first ply,

further comprising:

c) at least one layer of adhesive on said second ply,

d) and at least one layer of adhesive inhibitor on said first ply,

arranged so when said at least one layer of adhesive on said second ply

[faces] is in contact with said at least one layer of adhesive inhibitor on said first ply; said second ply is temporarily fastened to said first ply, whereby a detachable subordinate self sealing letter sheet is produced.

CLAIM 62, rewrite as claim 62 (amended) as follows

62) (amended) A self sealing form, comprising:

a) a sheet material cut into such a shape that a body and at least one flap are obtained,

b) at least one coating of a fastener and at least one coating of a fastener inhibitor, applied to said sheet material, in such a manner that when each of said at least one flap overlaps said body, said at least one layer of a fastener faces said at least one layer of a fastener inhibitor,

whereby each of said at least one flap fastens to said body in a **[temporarily]** temporary fashion, and

whereby said self sealing form is manufactured, and is ready to be used.

CLAIM 67, rewrite as claim 67 (amended) as follows

67) (amended) The self sealing form of claim **62)** wherein said self sealing form further comprises means for detachment of a section of said self sealing form, and said section further comprises:

c) a body and at least one flap,

d) at least one coating of a fastener and at least one coating of a fastener inhibitor, applied to said section of said self sealing form, in such a manner that when each of said at least one flap overlaps said body, said at least one layer of a fastener faces said at least one layer of a fastener inhibitor,

whereby each of said at least one flap fastens to said body in a **[temporarily]** temporary fashion,

whereby a detachable subordinate form is produced.

CLAIM 68, rewrite as claim 68 (amended) as follows

68) (amended) A self sealing letter sheet folded so it comprises:

a) a body and

b) at least one flap,

at least one layer of a repositionable adhesive **204** and at least one layer of a dry adhesive **202**, wherein said dry adhesive **202** is susceptible to become active upon being moistened,

and wherein said at least one layer of a repositionable adhesive **204** and said at least one layer of a dry adhesive **202** are disposed so when said at least one flap and said body are in contact **[to]** with one another, said repositionable adhesive **204** and said dry adhesive **202** avoid facing one another, and said at least one flap and said body are fastened to one another in a temporary fashion by the action of said repositionable adhesive **204**, whereby said self sealing letter sheet is produced and is now ready to be used.

45) A self sealing letter sheet, so structured as to enable:

1) a private message and

2) a discretionary non-private message,

so the need for an envelope is eliminated,

said self sealing letter sheet comprising:

a) a blank of a sheet material, further comprising:

b) at least one mono-sectional flap,

c) a mono-sectional body,

d) at least one layer of adhesive, and at least one layer of adhesive inhibitor applied to said blank of a sheet material, in such a manner that when each of said at least one mono-sectional flap is in contact with said mono-sectional body, said at least one layer of adhesive faces said at least one layer of adhesive inhibitor, whereby each of said at least one mono-sectional flap and said mono-sectional body can be removably fastened to one another,

whereby said self sealing letter sheet is manufactured,

and whereby the user can input said private message and said discretionary non-private message, and subsequently fold said body and seal said self sealing letter sheet.

49) The self sealing letter sheet of claim **45)** wherein said self sealing letter sheet further comprises means for detachment of a section of said self sealing letter sheet, and said section further comprises:

e) at least one mono-sectional flap,

f) a mono-sectional body,

g) at least one layer of adhesive, and at least one layer of adhesive inhibitor applied to said section, in such a manner that when each of said at least one mono-sectional flap is in contact with said mono-sectional body, said at least one layer of adhesive faces said at least one layer of adhesive inhibitor, whereby each of said at least one mono-sectional flap and said mono-sectional body can be removably fastened to one another,

whereby a detachable subordinate self sealing letter sheet is produced.

50) A self sealing letter sheet, comprising:

a) at least one flap,

b) a rectangular body,

c) at least one layer of an adhesive substance applied to each of said at least one flap,

d) at least one layer of an adhesive inhibitor substance applied to said rectangular body,

so when said at least one flap is placed in contact with said rectangular body, each of said at least one flap is temporarily connected to said rectangular body, whereby

said self sealing letter sheet is manufactured.

53) The self sealing letter sheet of claim **50)** wherein said self sealing letter sheet further comprises means for detachment of a section of said rectangular body, and said section further comprises:

e) at least one flap,

f) a rectangular subordinate body,

g) at least one layer of an adhesive substance applied to each of said at least one flap,

h) at least one layer of an adhesive inhibitor substance applied to said rectangular subordinate body,

so when said at least one flap is placed in contact with said rectangular subordinate body, each of said at least one flap is temporarily connected to said rectangular subordinate body, whereby

a detachable subordinate self sealing letter sheet is produced.

54) A self sealing letter sheet, folded so it comprises:

1) a first ply and

2) a second ply,

wherein said first ply is a body,

and said second ply is at least one flap, overlapping said first ply,

further comprising:

a) at least one layer of adhesive on said second ply, and

b) at least one layer of adhesive inhibitor on said first ply,

arranged so when said at least one layer of adhesive is in contact with said at least one layer of adhesive inhibitor, said second ply is temporarily fastened to said first ply, whereby said self sealing letter sheet is produced.

57) The self sealing letter sheet of claim **54)**, wherein said self sealing letter sheet further comprises means for detachment of a section of said self sealing letter sheet, and said section is folded so it further comprises:

1a) a first ply and

2a) a second ply,

wherein said first ply is a body,

and said second ply is at least one flap, overlapping said first ply,

further comprising:

c) at least one layer of adhesive on said second ply,

d) and at least one layer of adhesive inhibitor on said first ply,

arranged so when said at least one layer of adhesive on said second ply is in contact with said at least one layer of adhesive inhibitor on said first ply; said second ply is temporarily fastened to said first ply, whereby a detachable subordinate self sealing letter sheet is produced.

62) A self sealing form, comprising:

a) a sheet material cut into such a shape that a body and at least one flap are obtained,

b) at least one coating of a fastener and at least one coating of a fastener inhibitor, applied to said sheet material, in such a manner that when each of said at least one flap overlaps said body, said at least one layer of a fastener faces said at least one layer of a fastener inhibitor,

whereby each of said at least one flap fastens to said body in a temporary fashion, and

whereby said self sealing form is manufactured, and is ready to be used.

- 67)** The self sealing form of claim **62)** wherein said self sealing form further comprises means for detachment of a section of said self sealing form, and said section further comprises:
- c)** a body and at least one flap,
 - d)** at least one coating of a fastener and at least one coating of a fastener inhibitor, applied to said section of said self sealing form, in such a manner that when each of said at least one flap overlaps said body, said at least one layer of a fastener faces said at least one layer of a fastener inhibitor,
- whereby each of said at least one flap fastens to said body in a temporary fashion,
- whereby a detachable subordinate form is produced.

68) A self sealing letter sheet folded so it comprises:

a) a body and

b) at least one flap,

at least one layer of a repositionable adhesive **204** and at least one layer of a dry adhesive **202**, wherein said dry adhesive **202** is susceptible to become active upon being moistened,

and wherein said at least one layer of a repositionable adhesive **204** and said at least one layer of a dry adhesive **202** are disposed so when with one another, said repositionable adhesive **204** and said dry adhesive **202** avoid facing one another, and said at least one flap and said body are fastened to one another in a temporary fashion by the action of said repositionable adhesive **204**,

whereby said self sealing letter sheet is produced and is now ready to be used.
